To Whom It May Concern

This is to confirm that Jelena Bijelic has stayed in my research group at the Institute of Physical Chemistry of the Justus Liebig University Giessen within a visiting period in the year 2019.

Such a period lasted from 30th September to 14th October (2 weeks).

During this stay, she contributed to the development of 2D CsAgBiBr₆ double perovskite materials for photovoltaic applications.

Sincerely yours,

[Signature]

Dr. Teresa Gatti
